1 Objective

The Departure Club allows members to access the events wall, view flights, and reserve flights. The code was started by another team and we have taken over the development of the project.

There are some inconsistencies within the project. Please use all the best practices moving forward and stay consistent. Do not do additional work unless it's approved, at which point, it will be put together within an additional scope.

2 Details

The site can be accessed at:
https://staging.thedepartureclub.com/
Username: admin@hobojet.com[8]
Password: loodloo

- You can access the machine directly on the staging environment or work locally.
  - On the test project, we suggest working remotely to ensure that the majority of your efforts are spent on the tasks at hand.
- Please work on a separate branch, and remember to commit, commit, commit.
- Please provide your public key and we will provide you with access to the staging machine.

3 Success metrics

Goal	Metric
Successfully complete first round of objectives.	All requirements should be met.

4 Assumptions

- Users will be accessing the platform mainly through their desktop computer, however, users may also be accessed through their mobile devices. All main browsers should be compatible with the current code. Please use Chrome for testing on both desktop and mobile environments.

5 Requirements

	Requirement	Jira Issue	Notes
1	Administrators should be able to edit events.	https://exquisite.atlassian.net/browse/TDC-57	• You can currently edit the event, however, the image does not show within the edit modal, and you cannot save a new image. • The event date and time should also be set to reflect the existing time when editing the event.
2	Event dates should be displayed as Thursday, May 20th, 2020 from 8:50 pm to 10:30 pm		Currently, the dates are displayed as 2020-05-31 hh:mm:ss - hh:mm:ss and should be changed throughout the views. This exists on the following pages: • https://staging.thedepartureclub.com/events • https://staging.thedepartureclub.com/events/1 • https://staging.thedepartureclub.com/admin#/events

	Requirement	Jira Issue	Notes
3	When a user logs in, we should check the user's package_id and status and forward them to the Stripe billing page if required for their package.	https://exquisite.atlassian.net/browse/TDC-56	• Hobo Plans will allow for a 7-day free trial. We need to make sure that after the 7 day free trial the users status is set to 0. • You can see the billing history for the user under the billing_history table. • Packages are all within the billing_packages table.
4	Stripe webhooks should be set up for successful and failed billing and the status of the users package should be updated to indicate the billing status.	https://exquisite.atlassian.net/browse/TDC-56	• Webhooks should update the dates and billing status for the user. • Please make sure that there are appropriate handlers for success, failed, and expired payments and trials.

	Requirement	Jira Issue	Notes

5	Users should be able to Reserve seats to an event within the event details page.	https://exquisite.atlassian.net/browse/TDC-34	The event details page can be seen at https://staging.thedepartureclub.com/events/1
			
			• The registration form should include the following fields:
			    • First Name
			    • Last Name
			    • Email Address
			    • Phone Number
			    • Number Of Seats
			
			• The form should be pre-populated with the users details.
			
			• Sendgrid is used for sending email. The project has a mix of using HTML and Templates. Please use templates for sending the event.
			
			• The code for sending a confirmation to the user who reserved the event is located in app/Http/Controllers/EventsController.php under the getAll() function and is commented out.
			    • You'll see an ICS file being created and attached to the email as well. Please make sure that the event details are also provided within the ICS file.

	Requirement	Jira Issue	Notes
			• Users do not need to be stored anywhere, only an email needs to be sent.
6	Users w/o a valid plan or on the Hobo Package (Package 1) should be prompted to upgrade their account to a Founder Plan when trying to reserve a flight.		• Only Founder Tier accounts are able to schedule flights.

	Requirement	Jira Issue											Notes
7	All prices for Founder Tier users should have the package discount reflected.	**Key**	**Summary**	**T**	**Created**	**Updated**	**Due**	**Assignee**	**Reporter**	**P**	**Status**	**Resolution**	• Packages have a flat-rate cost and a discount associated. The discount is applied to the original flight cost and the flat-rate cost is the cost to the user for the package. • The package price exists on the flight widgets, the flight details, booking page, and should also be applied to the filters.
		TDC-29[9]	The price should also be reflected within the booking modal:[10]	☑	May 22, 2020 16:44	May 31, 2020 17:11		Stephan Shere	Stephan Shere	↓	IN PROGRESS	Unresolved	
		TDC-28[11]	The price should also reflect within the filtered returns when using the price filter:[12]	☑	May 22, 2020 16:44	May 31, 2020 17:14		Stephan Shere	Stephan Shere	↓	IN PROGRESS	Unresolved
